3.3 Known Issues	4
3.4 Known Workarounds	4
4.0 DATE/TIME OF OUTAGE.....	5
5.0 RELEASE RECOMMENDATION	5

1.0 How to Read This Document

The release description is separated into several sections. The purpose of the document is to outline the test recommendation on whether or not to proceed with the next planned step in deployment, whether that is to an acceptance test phase or to production. Additionally, the release details are outlined in the other sections. The major sections and their purpose are outlined below:

- ***Delivered Functionality*** – All requests scheduled for the target point release.
- ***Impacts to the MSIX Environment*** – This section summarizes the review of all aspects of the MSIX environment and their impact on the release.
- ***Deviations from the Test Plan*** – This section lists areas where the test plan and/or approach were modified during the course of the project to accommodate project or program changes. If one area necessitated more or less attention than planned, that would be outlined here.
- ***Known Issues*** – Issues that exist at the time of the release. These would coincide with the Recommendation Type.
- ***Known Workarounds*** – Workarounds that exist in conjunction with the Known Issues.
- ***Recommendation*** – This section summarizes the recommendation by the test organization on whether to proceed or not. The recommendation will prompt the reader whether it is necessary to read in-depth further in the document to make a business decision to proceed, although it is always recommended to read the entire document before proceeding. The options for recommendation are:
 - Release with No Issues
 - Release with Minor Issues
 - Release with Major Issues
 - Do Not Release

2.0 Delivered Functionality

AMPM Request	Short Description
485246	Data Administrator link in some students Historical View (and some Worklists without enrollments) are not populating contact information for Data Administrators
620067	State Student ID History Page: Primary User can see a Raw View link (which should only be available to Data Administrators)
639068	The system throws a Java error if a User Role is not selected when creating a new user account.
639441	Using the Clear Form button on the Data Validity and Data Completeness report filters, the report output include all of the state folders
639448	After applying and clearing the filter, the Student Demographic report does not return any data
647030	Customer seeing discrepancy on the count report
661562	Unexpected behavior from the Enrollment by MDE Type report filter for states
664881	Tomcat 6.0.32 Vulnerability

2.1 Deferred Changes

The following changes were deferred to a later release, to allow complete testing and review.

- No deferred changes

3.0 Impact & Exceptions

None

3.1 Impacts to the MSIX Environment:

Impacts to the environment were reviewed. This functional release has no impact to the MSIX environment. The release items include functional enhancements.

3.2 Deviations from the Test Plan

There are no deviations from the test plan.

3.3 Known Issues

There are no known issues

3.4 Known Workarounds

Not applicable.

4.0 Date/Time of Outage

10/20/2012 12:00AM – 10/22/2012 05:00AM EST

5.0 Release Recommendation

Release To:	Recommend Yes/No	Recommendation Type
Production	Yes	Release with No Issues
